To whom it may concern,

On March 18, 2014, the Upper Ocmulgee River Soil and Water Conservation District voted to enact the following erosion and sediment control plan review policy: After four standard checklist items have been found missing or incorrect, the plan reviewer will stop the review and deny the plan to be sent back for resubmission. The plan designer should not assume that only four items are missing or incorrect as there could be others. However, in accordance with this policy, the plan reviewer will only address the first four checklist items that are found to be missing or incorrect. The erosion and sediment control plan will then be sent back for resubmission, and it will be the responsibility of the plan designer to address those four items and any other checklist items that may be missing or incorrect. Should you have any questions or concerns regarding this policy, please contact Keegan Malone at 478-445-5766 or by email at kmalone@gaswcc.org. This policy will be enacted as of March 18, 2014.

Respectfully,

Phil Standard, Chairman
Upper Ocmulgee River Soil and Water Conservation District
